

Formulario di trigonometria

$$a = c * \sin \alpha$$

$$a = b * \tan \alpha$$

$$\alpha = \tan^{-1} \left(\frac{a}{b} \right)$$

$$a = c * \cos \beta$$

$$a = b * \cot \alpha \beta$$

$$\beta = \tan^{-1} \left(\frac{b}{a} \right)$$

$$b = c * \sin \beta$$

$$b = a * \tan \beta$$

$$\alpha = \cot \alpha n^{-1} \left(\frac{b}{a} \right)$$

$$b = c * \cos \alpha$$

$$b = a * \cot \alpha n \alpha$$

$$\beta = \cot \alpha n^{-1} \left(\frac{a}{b} \right)$$

$$c = \frac{a}{\sin \alpha}$$

$$\tan \alpha = \frac{a}{b}$$

$$c = \sqrt{a^2 + b^2}$$

$$c = \frac{a}{\cos \beta}$$

$$\tan \beta = \frac{b}{a}$$

$$a = \sqrt{c^2 - b^2}$$

$$c = \frac{b}{\sin \beta}$$

$$\cot \alpha n \alpha = \frac{b}{a}$$

$$b = \sqrt{c^2 - a^2}$$

$$c = \frac{b}{\cos \alpha}$$

$$\cot \alpha n \beta = \frac{a}{b}$$

$$\alpha = \sin^{-1} \left(\frac{a}{c} \right)$$

$$\beta = \sin^{-1} \left(\frac{b}{c} \right)$$

$$\alpha = \cos^{-1} \left(\frac{b}{c} \right)$$

$$\beta = \cos^{-1} \left(\frac{a}{c} \right)$$
